

# L. Mosenfelder's Acre Addition

## WHERE THEY ARE SELLING Acres at Lot Prices

So much can be accomplished on one of these beautiful, all level acre lots that the cost of living can be reduced to a minimum.

This acre addition is located in that part of the city where the development is most pronounced, ideal for a home or an investment.

### Representatives Will be on the Ground Tomorrow

from 9:30 a. m. to 4 p. m. and will take pleasure in showing these acres and will explain to you the advantage derived from one of these beautiful acre lots.

Take the Long View car to Eighteenth avenue and Thirtieth street and a few minutes' walk south will bring you to the L. Mosenfelder acre addition.

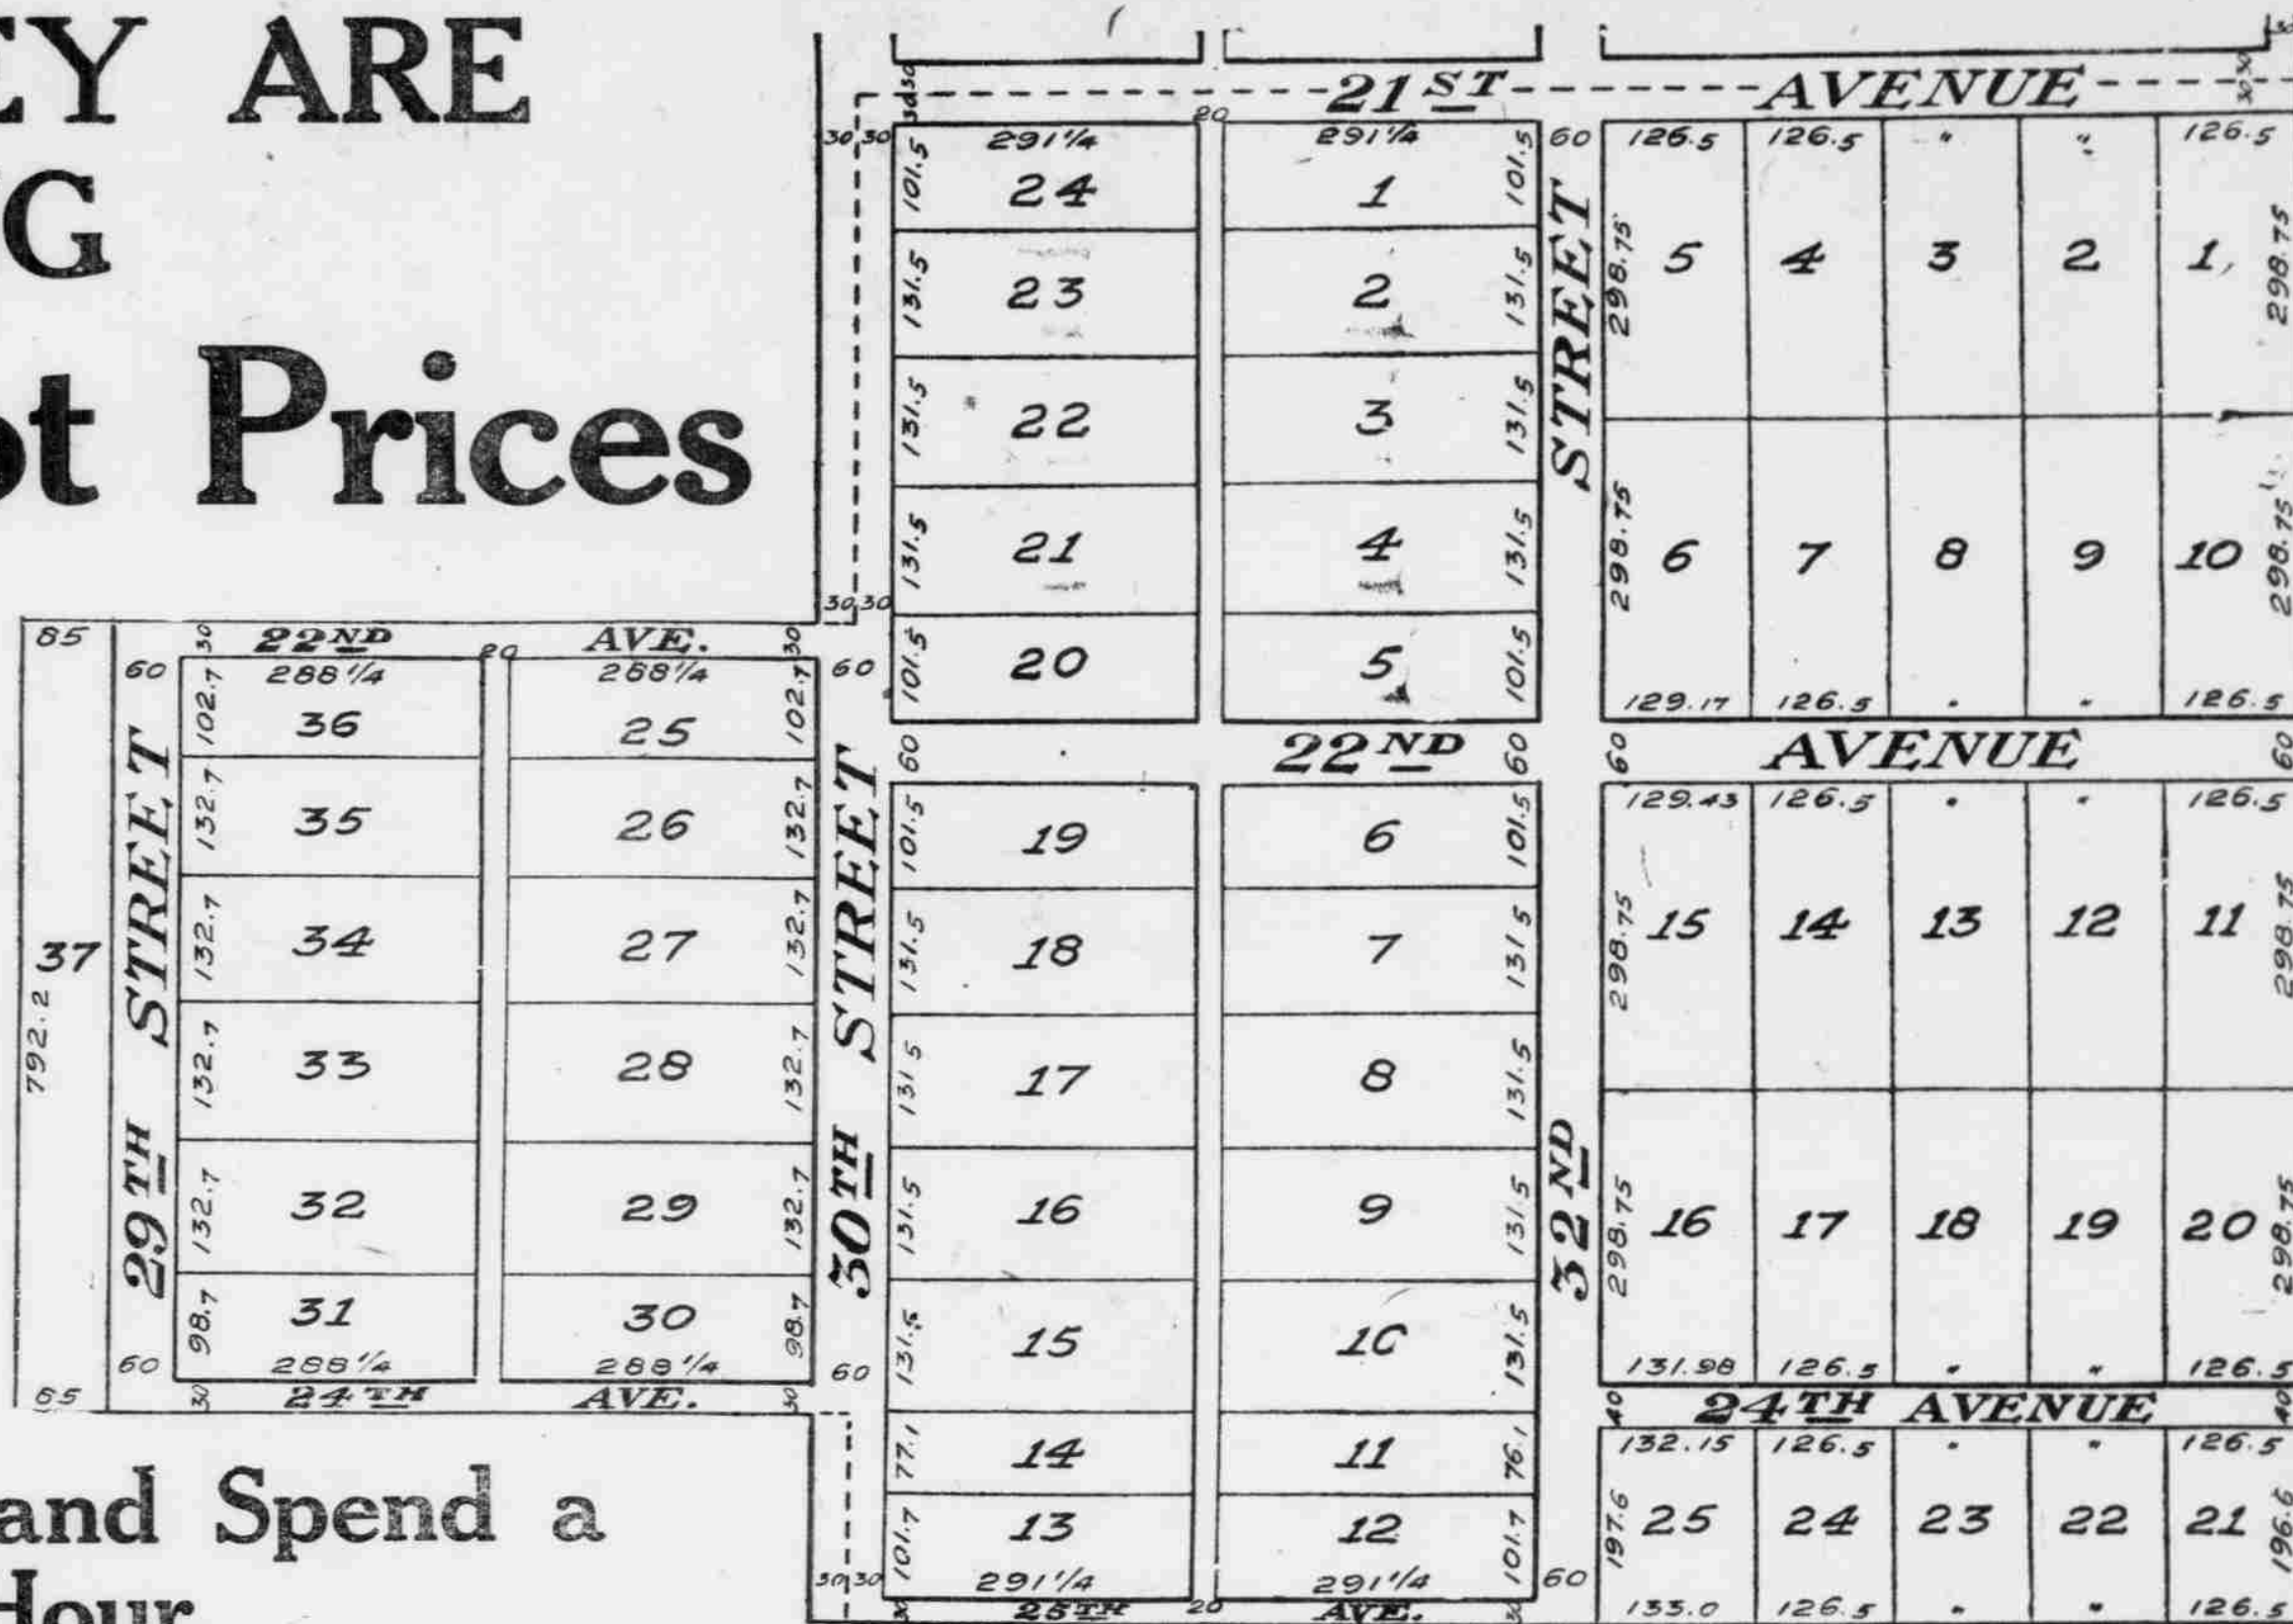

This addition is most centrally located and its accessibility to the various factories in Moline and Rock Island must recommend it to those residing in either place.

The prices asked for these beautiful large acre lots are less than ordinarily asked for a small lot.

## Be Out Tomorrow and Spend a Profitable Hour

# L. Mosenfelder's Acre Addition

On Thirtieth Street Road.  
Take Elm St. or Long View Car

### WORLD DEMAND IS FOR TRAINED MEN

Superintendent Mahoney of Moline Discusses Changes of Time in Augustana Address.

#### LINCOLN REALIZED HANDICAP

Last 50 Years Sees More Progress Than Any Five Centuries of Time, It Is Held.

Declaring that adequate preparation of a generation ago for the affairs of life was no longer adequate preparation at the present time, Superintendent L. A. Mahoney of the Moline public schools yesterday evening made a plea for a college education in an address delivered at the annual reception of the Augustana faculty in the reading room of the Denkman Memorial library. "I have yet to see," he reiterated, "any of the gray beards who achieved success in business 30 years ago without an education who would be fitted today to achieve the same success with the same preparation."

In this connection Mr. Mahoney brought in the name of Abraham Lincoln, the best example of the success of a self-made man, and declared that Lincoln himself realized the tremendous disadvantages which he had in not being college trained. According to Mr. Mahoney, Lincoln once declared this deficiency after listening to an argument of a college-trained lawyer and announced to his friends that he was going back to Illinois to study law so that when the college man came west, Lincoln would be ready for him. "Lincoln," the speaker declared, "unlike most men, did not worship his maker."

"The last 50 years," said the speaker, "have seen more progress in this world than any other five centuries of time. In that time the telephone, wireless telegraphy, the automobile and the airplane have come in; the population of the United States has increased 400 per cent and the development of business in this country has progressed that a man can no longer be a success in this line without a college education. Fifty years ago 54 per cent of the college graduates went into the professions and 16 per cent into business. Today 54 per cent go into the professions and 46 per cent into business. These figures show that the business today is demanding college-trained men to do it."

### Cockroaches Rats and Mice

Nothing is more disagreeable than a home infested with these pests. Destroy them with Stearns' Electric Rat and Mouse Paste, the standard exterminator for over 27 years. Does not blow into food like powders, ready for use. Directions in 15 languages. U. S. Government buys it. Sold everywhere. 25c and \$1.00. Stearns' Electric Paste Co., Chicago, Ill.

### HOW UNCLE SAM HELPS FISH LIFE

Work of the Fairport Biological Station is Explained Before Broadway Men's Club.

#### DIRECTOR IS THE SPEAKER

Equipment, Problems and the System Employed at Establishment Illustrated by Stereopticon.

If the present plans of the men who have charge of the work at the Fairport biological station are carried through, it will be possible, in another year or two, for any person who owns a pond or lake to ask Uncle Sam and receive full information as to the kind, quality and number of fish with which the pond may be most successfully stocked.

This is one of the by-products of the work at the station, as described by Director A. F. Shira in his address to the Broadway Presbyterian Men's club at night. The activities at the station were considered in detail, and the account proved a revelation to the men in the audience, most of whom knew merely that the government has some sort of work going on at Fairport, which has to do with fish.

By means of stereopticon pictures Mr. Shira showed up the equipment, the problems and the work of the station most clearly. From the establishment of the station to the present time most of the attention has been devoted to the propagation of the fresh water clams, whose shells are useful in button making.

These clams are of a parasitic growth, and it is necessary for the young ones to become attached to the gills and fins of fish during a part of their growth in order that they may live and develop. Thus, it is a part of the work of the scientists at the station to rescue fish which have been left in sloughs and ponds when the rivers go down in the summer, and to see that the rivers are kept well stocked with fish of the right sort, in order to provide the necessary brooding places for the clams.

Mr. Shira explained the methods used for artificially "infecting" the fish with the young clams, showing clearly the careful and painstaking work being done in this line by the men of the bureau of fisheries.

#### Gives Purpose of Work.

The purpose of this work, of course, is to maintain a supply of clam shells for the use of button makers, but incidentally, the men are seeking ways for the clam meat, thousands of tons of which are wasted every year. If they can solve this problem they will thereby make an important addition to the food supply. At the same time, they are making a large contribution by the preservation of the common varieties of fish, such as bass, carp, catfish, buffalo and other edible varieties.

The address by Mr. Shira was given to an appreciative audience of men, who attended the opening meeting of

### TRENKENSCHUH IS GIVEN MAIN JOB

Rock Island Contractor Awarded Big Work By City for Laying of Long Line of Water Piping.

#### OWNERS OBJECT TO PAYING

Property Holders Do Not Want Improvement on Twenty-Fifth Avenue—Painting Bids Laid Over.

As the lowest bidder by \$17,250 P. F. Trenkenschuh was awarded the contract for the construction of water mains on Ninth, Eleventh, Twelfth and Fourteenth streets between Forty-second and Forty-seventh avenues, when the bids were opened in the mayor's office today. Mr. Trenkenschuh's bid for the work was \$11,356.50 and the only other bid entered was that of Walter H. Bedell. He asks \$11,532.75 for the work. This work of laying water mains in that district was agreed to by the city in an ordinance at the time of the annexation of Sears.

At a called meeting more than a score of property owners appeared at the mayor's office this morning to object to the proposed paving of Twenty-fifth avenue from Twelfth to Seventeenth streets. H. A. Weld, who has been before the city commission a number of times to get this paving through, was not present and it appeared that he was the only property owner in that vicinity that favored the project. As a result the board of local

### UNION WAR VETERAN PAID AFTER 50 YEARS

Joliet, Ill., Sept. 16.—After waiting 50 years, John Finold, a Joliet real estate dealer, today received a government check for \$201.91. It was paid for his services in the Union army during the Civil war.

## LITTEN and ROBERTS 6% FARM MORTGAGES

Peoples National Bank Building

Beautiful Bust and Shoulders are possible if you will wear a scientifically constructed Bien Jolie Brasier. The dragging weight of an unconfined bust stretches the supporting muscles that the contour of the figure is spoiled. put the bust back where it belongs, prevent the full bust from having the appearance of flatness, eliminate the danger of dragging muscles and confine the flesh of the shoulder giving a graceful line to the entire upper body. They are the simplest and most serviceable garments imaginable—come in all materials and styles: Cross back, Hook Front, Surplice, Bandeau, etc. Bonded with "Walein," the rustless lining—permitting washing without removal. Have your dealer show you Bien Jolie Brasiers. If not stocked, we will gladly send him, prepaid, samples to show you. BENJAMIN & JONES, 31 Warren Street, Newark, N. J.

improvements dropped the matter entirely, although it had been decided to put the paving through if the people desired it.

Bridge Bid Laid Over. Bids were also opened on the painting of bridges No. 3 and 4 over Rock river. There were only two proposals entered. They were: Ernest B. Waite, \$325, and P. J. Lee \$554. The bids were laid over with action to be taken on them Monday afternoon at the meeting of the commission.
